PROFESSIONAL SUMMARY

Software Developer and AI enthusiast with hands-on experience in Python, web development, FastAPI, and MySQL. Experienced in building full-stack applications, AI-assisted tools, and data-driven solutions. Recognized as a **Top 10 finalist** in the 2025 Awarri Hackathon for *HealthAtlas*, a digital health platform. Adept at problem-solving, collaborating on complex projects, and translating ideas into working applications. Seeking opportunities in AI, software development, and backend/frontend engineering.

TECHNICAL SKILLS

Programming & Web: Python, JavaScript, HTML, CSS

Frameworks & Tools: FastAPI, RestAPI, React, Flask, Git/GitHub, VS Code

Databases: MySQL, SQLite

AI & Data: Data Annotation, Prompt Engineering, AI Workflows, Machine Learning Fundamentals

Other Tools: Microsoft Office, Canva, Technical Documentation, API Integration

TECHNICAL TRAINING

Publica Academy — Software & Digital AI Skills Training | August 2025- Till present

- Learned programming, web development, backend frameworks, and API development
 - Built full-stack projects and used GitHub for version control
 - Gained practical exposure to AI workflows, database integration, and deployment
-

WORK EXPERIENCE

Data Annotator — Awarri | Dec 2025- Jan 2026

- Labeled and structured datasets used for training AI models
 - Ensured tagging consistency and quality, handling large datasets
 - Gained practical exposure to AI development pipelines and data preprocessing
-

PROJECTS

HealthAtlas — Full-Stack Health Platform (*Top 10, Awarri Hackathon 2025*) | [HealthAtlas Link](#)

Health Atlas is an AI assistant focused strictly on health, symptom triage, and first-aid guidance. It uses a small ecosystem:

- A Next.js frontend app that provides UI and auth flows
- A FastAPI backend that handles auth/profile using Supabase
- A model service (Gradio + FastAPI) serving a streaming text endpoint for chat responses

Important: The system prompt enforces strict domain rules (no diagnoses, no medication/dosage, strict refusal when out-of-scope).

Portfolio Website [DrFavour Portfolio](#)

- Created a responsive portfolio to showcase skills, projects, and GitHub repos
- Designed for mobile and desktop views
- Highlights your growth and technical journey

Nigerian States App — Frontend and Backened | [GitHub Repo](#)

- Built the user interface for a Nigerian states/app frontend project
- Structured dynamic dropdowns and UI logic for selecting states/locations
- Demonstrated practical understanding of web app design and data interaction

Expense Tracker Web App

- Developed a Python and JavaScript web application to track income and expenses
- Implemented logical data handling and frontend display for financial management

AI Productivity & Automation Projects

- Experimented with AI prompt engineering for content creation and workflow automation
 - Built practical tools demonstrating AI-assisted productivity
-

EDUCATION

Doctor of Veterinary Medicine (DVM)

Federal University of Agriculture, Abeokuta (FUNAAB), Ogun State, Nigeria

Oct 2018 – June 2025

SOFT SKILLS

- Problem-solving
- Fast Learner
- Team Collaboration
- Attention to Detail
- Clear Communication
